

PAWS System User Guide

Launching the Application

You can run the application on the terminal using:

```
python main_ui.py
```

Once launched, the PAWS interface will open.

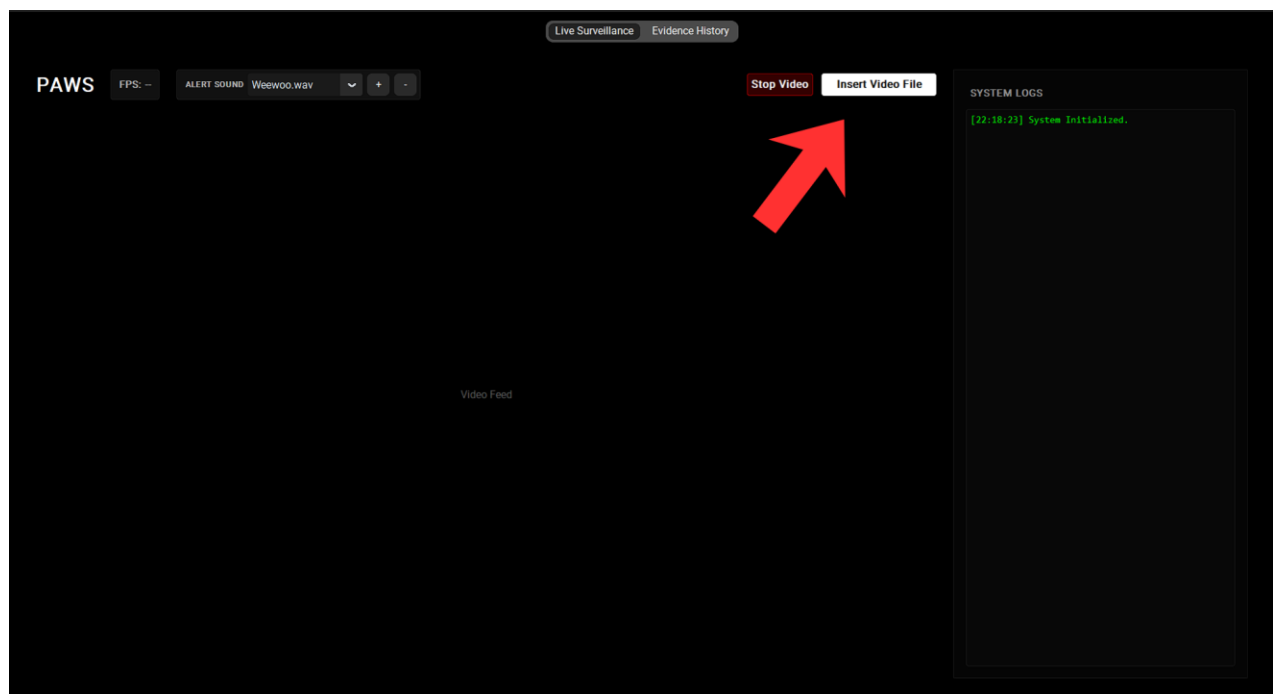

How to Use PAWS

1. Insert a Video

Click **Insert Video File** and select a CCTV or recorded video clip.

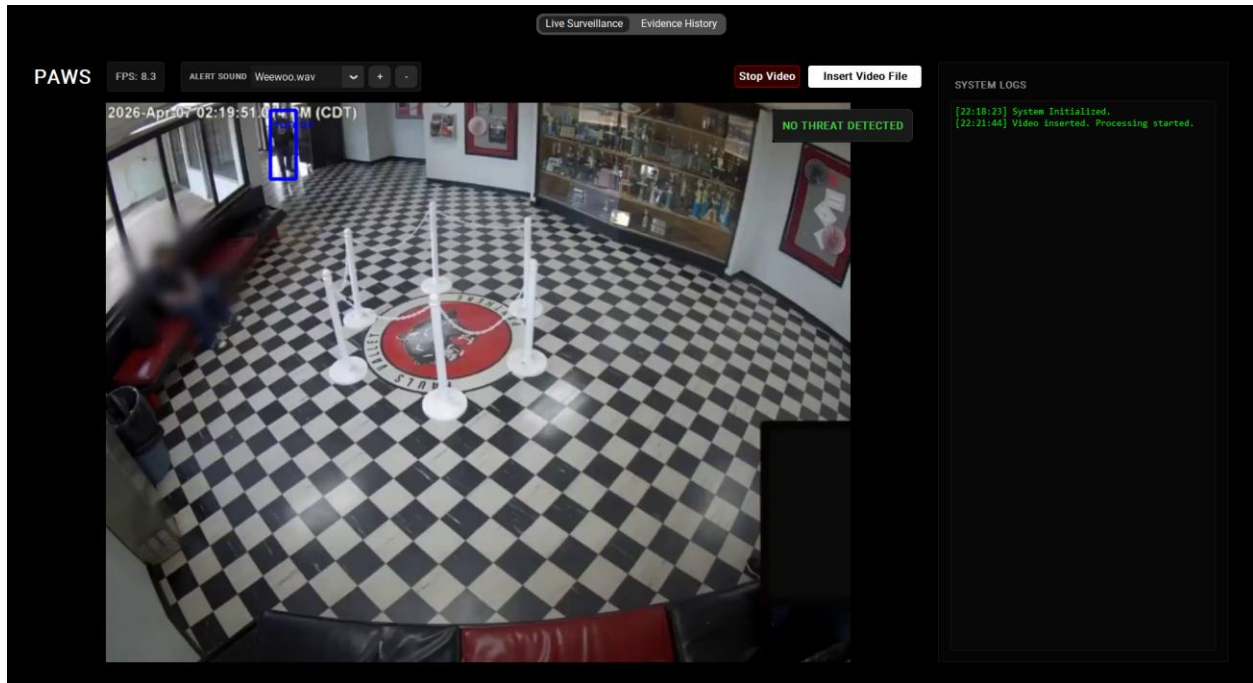

Supported video formats:

- .mp4
- .avi
- .mov
- .mpeg
- .mpg

2. Start Video Analysis

After selecting a video, the system automatically begins analyzing the feed. The interface updates in real time while processing.

3. Monitor Detection Results

Detection results appear in:

- The pre-processed video feed
- The System Logs panel
- Status overlays and alert banners

Possible status labels:

- NO THREAT DETECTED
- MONITORING
- SAFE INTERACTION
- PHYSICAL ALTERCATION

Weapon detections also display labels directly on the video feed.

Main Interface Overview

Top Bar

Contains:

- FPS counter
- ALERT SOUND dropdown
- Add and Remove audio buttons
- Insert Video File button
- Stop Video button

Video Area

Displays:

- Live video playback
- Detection overlays
- Threat status indicators
- Alert banners

System Logs Panel

Shows:

- Real time alerts
- Detection timestamps
- Logged threat events

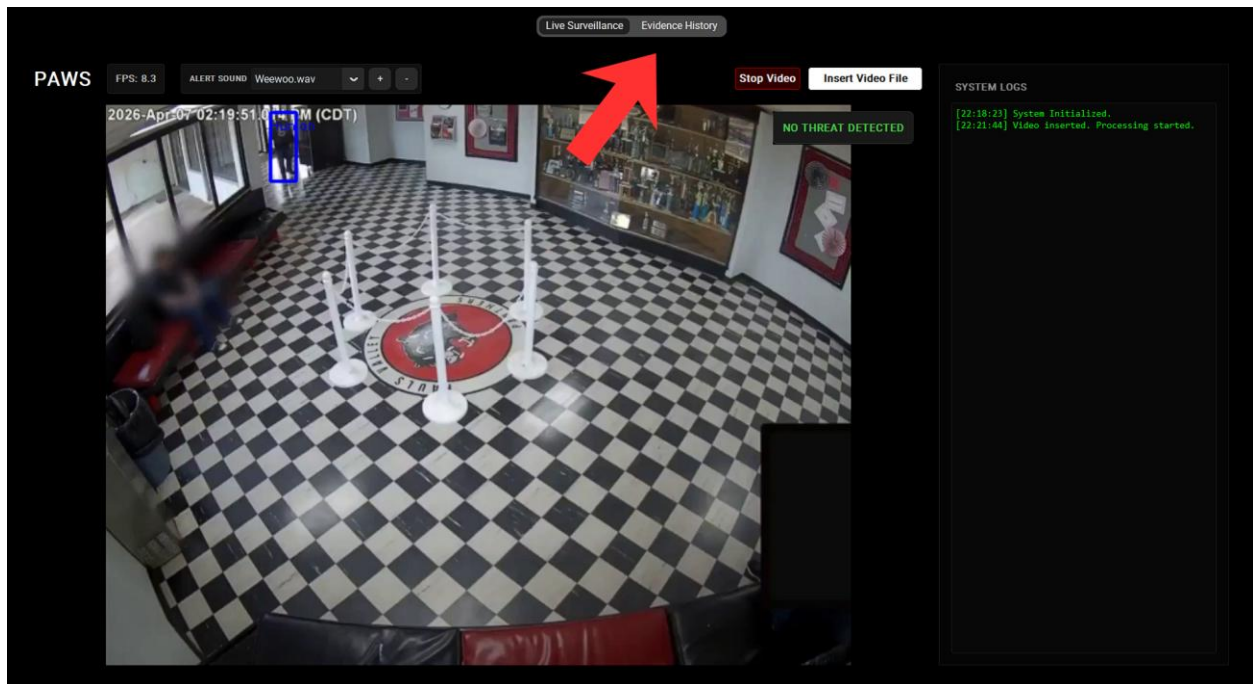

Evidence History

When threats are detected, PAWS automatically captures evidence images.

To review evidence:

1. Open the **Evidence History** tab
2. Click a thumbnail to enlarge the image
3. Use **Refresh** to update the list
4. Use **Clear All** to remove saved evidence

Evidence images are stored inside the evidence/ folder.

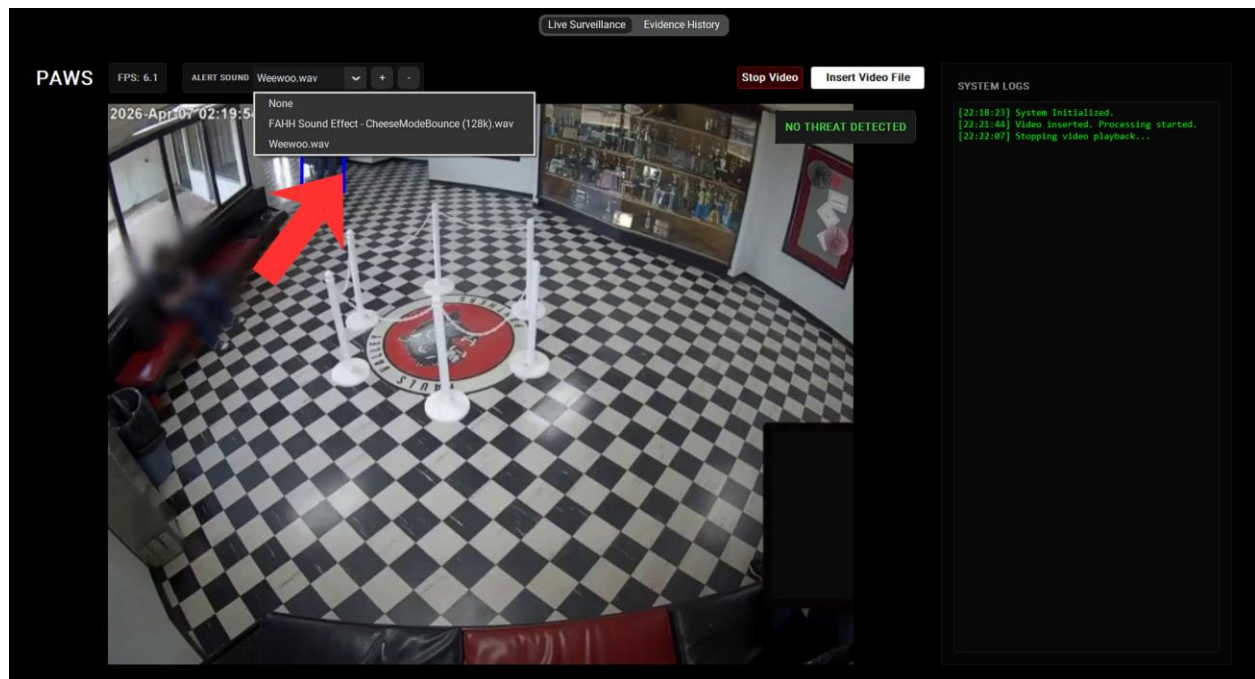

Audio Alerts

Users can:

- Select an alert sound from the dropdown
- Add custom audio files
- Remove audio files from the list

Supported audio formats:

- .mp3
- .wav
- .ogg
- .m4a

Simple Troubleshooting

Missing Evidence Images

- Open the evidence/ folder
- Use the Refresh button in Evidence History

Slow Processing

- GPU acceleration is recommended
- CPU only systems process videos slower

Best Practice Tips

- Use clear and high-quality CCTV footage
- Ensure subjects are visible and unobstructed
- Review captured evidence manually before taking action
- Keep evidence confidential and properly secured
